

The Limits to Satisfaction: An Essay on the Problem of Needs and Commodities

Author: William Leiss

Publisher: McGill-Queen's University Press (1988-09-01)

Buy this book from [Amazon](#) or [Chapters](#).

Leiss draws on economics, psychology, sociology, and anthropology to show the vagueness of our thought on the relation between nature and culture, desire and reason, needs and commodities. This book raises serious, vital questions for all those concerned about the future of our present society.

Contents

On the Back

Leiss draws on economics, psychology, sociology, and anthropology to show the vagueness of our thought on the relation between nature and culture, desire and reason, needs and commodities. This book raises serious, vital questions for all those concerned about the future of our present society.

"Leiss gives consistency to ... a new discipline that challenges the monopoly of economics over social policy. But he does more: he radicalises the concept of ecology." Ivan Illich, *Manchester Guardian*

"Leiss critically examines the bogus issue of false vs. true needs and shows that Critical Theory, Western Marxism and most radical sociology have been misguided in posing the question in this fashion ... It is clearly written, well documented, brilliantly argued. A refreshing break from vacuous sociologese. " Paul Piccone, *Theory and Society*

"Leiss argues his case here cogently, persuasively and free from any bucolic romanticism." Alkis Kontos, *Canadian Journal of Political and Social Theory*
